## **2 way switch wiring diagram Light wiring**

January 16th, 2019 - The first reason this is BAD is on safety grounds say we are working on the light upstairs so we turn off the upstairs lighting circuit thinking we are safe WRONG The live is picked up downstairs and there are still live conductors feeding the switch upstairs and if someone flipped the downstairs switch in this diagram that live feed would extend all the way to the lamp too youâ€™re fried

## **Twin and earth cable current ratings Light wiring**

January 15th, 2019 - When considering cable ratings care needs to taken as this is not as straight forward as it may seem For example if you check the manufacturers current rating for 1.5 twin and earth cable suitable for most lighting circuits in a domestic environment it will state that it is around 20 amps but this value would only apply if the cable was in free air as it can cool easily
